

Amish Koli

MERN Stack Engineer | Polymath

Mumbai, India | amishkoli77@gmail.com

linkedin.com/in/amishkoli77 | github.com/amish-koli | x.com/Amish_koli7

SUMMARY

Final-year AI & Data Science student and MERN stack engineer who enjoys building clean, responsive web apps and learning across disciplines. Comfortable with JavaScript, React, Node.js, Express and MongoDB.

EDUCATION

BE in Artificial Intelligence & Data Science

RGIT Mumbai | Final Year

SKILLS

Languages: JavaScript, HTML, CSS

Frontend: React

Backend & Database: Node.js, Express, MongoDB (MERN stack)

Tools: Git, GitHub, Vercel

PROJECTS

Personal Planner

HTML, CSS, JavaScript | Live: focuson-six.vercel.app

- Built a responsive productivity app with a to-do list, Pomodoro timer (25/5 cycle with audio alert), and a goal planner that sorts goals by priority.
- Implemented persistent task storage using browser cookies, so data stays after the browser is closed, with no backend needed.
- Designed a neumorphic UI that works across mobile, tablet and desktop, with smooth task animations and a refreshable motivational quote section.
